PUP PROFILE

History

The Polytechnic University of the Philippines (PUP) is a government educational institution governed by Republic Act Number 8292 known as the Higher Education Modernization Act of 1997, and its Implementing Rules and Regulations contained in the Commission on Higher Education Memorandum Circular No. 4, series 1997. PUP is one of the country's highly competent educational institutions. The PUP Community is composed of the Board of Regents, University Officials, Administrative and Academic Personnel, Students, various Organizations, and the Alumni.

Governance of PUP is vested upon the Board of Regents, which exercises policy-making functions to carry out the mission and programs of the University by virtue of RA 8292 granted by the Commission on Higher Education. The University is administered by an appointed President by virtue of RA 8292 and is assisted by an Executive Vice President and the Vice Presidents for Academic Affairs, Student Services, Administration, Research, Extension and Development, and Finance.

This institution started as the Manila Business School (MBS), founded in October 19, 1904 as part of the city school system under the superintendence of C.A. O'Reilley, which responds to the demand for training personnel for government service and the felt need to provide skills essential for private employment. In 1908, it was renamed as Philippine School of Commerce (PSC) and merged with the Philippine Normal School (PNS) in 1933 to 1946. By virtue of Republic Act 778, the PSC was again changed to Philippine College of Commerce (PCC) in 1952. Subsequently, the Philippine College of Commerce (PCC) was converted into a chartered state university, now known as the Polytechnic University of the Philippines by virtue of Presidential Decree Number 1341 issued by the President of the Philippines on April 1, 1978.

PUP is a public, non-sectarian, non-profit institution of higher learning primarily tasked with harnessing the tremendous human resources potential of the nation by improving the physical, intellectual and material well-being of the individual through higher occupational, technical and professional instruction and training in the applied arts and sciences related to the fields of commerce, business administration, and technology.

With more than twenty campuses serving more than 80,000 students, the Polytechnic University of the Philippines is the largest university in terms of student population. The main campus is named after a national hero, Apolinario Mabini, and is located in Sta. Mesa, Manila - in the middle of a busy metropolitan. But despite of this, the environment within its perimeter is a place conducive of learning.

Majority of the students belong to the economically challenged level of society. It is the University's commitment to give qualified and talented students access to quality and responsive education to aid them in the achievement of their dreams and improve their lives. Being a well-educated and skilled individual, they will not only become job seekers but job creators as well, a force of knowledge workers and entrepreneurs.

Scholars of the Nation (*Iskolar ng Bayan*), that is what we call our students because the Philippine Government and other non-government institutions subsidize their tuition and other fees. More than a hundred of the student population are foreigners from China, Singapore, Indonesia, Cambodia, Myanmar, Tanzania, Nigeria, and Ghana. They are enrolled in business, language, statistics, communication, and education courses in the undergraduate and graduate levels. Students from Korea regularly visit PUP in summer to take up Intensive English courses.

The Polytechnic University of the Philippines takes pride in its capability to accommodate the student needs because it:

- Has more than 20 campuses to make education accessible to everyone;

- Offers a wide range of courses: doctorate, master's, and bachelor's degrees as well as technology courses available through traditional and open, flexible or distance learning;
- Pioneered the ladderized system and the accreditation and equivalency system through the Expanded Tertiary Education Equivalency and Accreditation Program (ETEEAP) and the Nontraditional System Program (NTSP);
- Maintains an average size of 45-50 students per class;
- Offers an extensive selection of educational choices through more than 60 undergraduate and graduate programs;
- Schedules weekend and evening classes;
- Brings the resources and programs of PUP not only to full-time students but also to part-time and adult learners; and
- Provides a long list of extension services for the community and the country.

The commitment of its leaders, faculty, staff, students, alumni and friends has formed the cornerstone of this University that has exceeded expectations with every generation of the graduates it has produced since its establishment.

Today, PUP is relishing its successes and its students are enjoying unprecedented academic opportunities, an enhanced campus environment, upgraded colleges, state-of-the-art technology, and nationally and internationally recognized programs.

PUP celebrated its centenary last October 2004. It has gone far from what it was more than a century ago. This is mainly due to the support given by the government and the PUP Community and its benefactors. With the combined effort, PUP will continue to be a partner in nation-building and in poverty alleviation for the marginalized sector of society with quality, responsive, and relevant education as a tool.

Vision

Clearing the paths while laying new foundations to transform the Polytechnic University of the Philippines into an epistemic community.

Mission

Ensuring inclusive and equitable quality education and promoting lifelong learning opportunities through a re-engineered polytechnic university by committing to:

1. provide democratized access to educational opportunities for the holistic development of individuals with global perspective.
2. offer industry-oriented curricula that produce highly-skilled professionals with managerial and technical capabilities and a strong sense of public service for nation building.
3. embed a culture of research and innovation.
4. continuously develop faculty and employees with the highest level of professionalism.
5. engage public and private institutions and other stakeholders for the attainment of social development goal.
6. establish a strong presence and impact in the international academic community.

Philosophy

As a state university, the Polytechnic University of the Philippines believes that:

- Education is an instrument for the development of the citizenry and for the enhancement of nation building; and

- That meaningful growth and transformation of the country are best achieved in an atmosphere of brotherhood, peace, freedom, justice and nationalist-oriented education imbued with the spirit of humanist internationalism.

Polytechnic University of the Philippines – Biñan Campus

Polytechnic University of the Philippines – Biñan Laguna Campus consistent to its mission of making city of Biñan into premier city with a tagline of ‘Unlad Biñan!’, former Mayor Marlyn B. Alonte-Naguiat now a Congresswoman of Lone District of Biñan City entered into agreement with Polytechnic University of the Philippines (PUP) through a Memorandum of Agreement (MoA) dated September 15, 2009 to establish a PUP campus in the city of Biñan. Through this partnership, quality education become accessible to every Biñanense, thus, respond to the needs of the largest estates and export processing zones located in the city. Equipped with (13) classrooms, (3) laboratory rooms, an audio-visual room, a student-center, an air-conditioned library and an elevator, PUP-Biñan Campus presently offers (8) Bachelor Degree and (2) Diploma Courses.

(Source: PUP-Biñan)

Rationale of the On-The-Job Training

On-The-Job Training also called practicum of internship depending on the nature of the academic program, is a course requirement for baccalaureate degree which provides as opportunity among students to apply the theories, principles and ideas learned in the academic environment to actual work settings under the guidance and supervision of their skills and prepare them for the “world of work” after collage. Attainment of the On-The-Job Training program objectives ensures the readiness of the graduates to face the challenges of the industry. Hence, vital as it is, OJT should be dynamic, technical, and managerial skill-centered for the students to effectively grasp the practical learning in the workplace.

(Source: MEMORAN ORDER NO.01 SERIES 2017)

COMPANY PROFILE

Leads Agricultural Products Corp. (LAPC)

Since 1997, **Leads Agricultural Products Corp. (LAPC)** has been the partner of Filipino farmers in sustaining their livelihood. **For almost three decades now**, Leads Agri has been nurturing the vision of a developed society rooted in an agricultural system that thrives amid calamities and global pandemics. By collaborating with groups that share the same goal in uplifting the Philippine agricultural sector, the company strives to overcome our unrealized potential in industries connected to it.

The year 2020 saw us breach the 2-billion peso sale mark. This, with the company starting small and initially overlooked by the industry and that barely hits their growth targets, is benchmark of progress. We now have more than 500 employees serving over a thousand agricultural dealers and distributors, which equip millions of Filipino farmers with the right tools and technology nationwide.

With these strong advantages under our wing, the Leads Group of Companies now has ten subsidiaries that foster the same principles.

With an experience portfolio that covers multiple industries, we continue to expand a dream started by Filipinos for the Filipinos.

LEADS Mission

Leads Agri is committed to provide a broad portfolio of science-based and cost effective agricultural solutions to Filipino farmers through various channels in all agricultural areas in the Philippines through cutting edge and innovative technology. We strive to improve market reach by empowering the farming communities and other stakeholders in the agriculture value chain to produce sustainable, accessible, and affordable food for every Filipino family.

We engage every individual with dignity and utmost respect regardless of societal status. **"Paggawa ayon sa patnubay ng pananampalataya at malasakit"**

LEADS Vision

As the leading company that provides future-proof farm productivity solutions and services, we envision to be a pillar of hope and assume a pivotal role towards innovating the country's agricultural value chain for the welfare of the Filipino farmers.

Company Tagline

"Masaganang Ani, Masaganang Buhay"

Core Values

- **Service:** Commitment to understanding and meeting the needs of Filipino farmers.
- **Innovation:** Pursuing high-quality and innovative products to improve agricultural practices.
- **Community:** Engaging in local initiatives and supporting the community projects to uplift lives.

- **Ethical Business Practices:** Adhering to ethical standards and market-driven initiatives to enhance customer satisfaction.

These values guide the company's operations and its approach to serving the agricultural sector in the Philippines.

WEEKLY JOURNAL

Republic of the Philippines

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
Office of the Vice President for Campuses
BIÑAN CAMPUS

On-The-Job Training Program
Second Semester 2026
Internship: INTE 404

WEEKLY JOURNAL ACTIVITIES

INCLUSIVE DATE/S	NATURE OF ACTIVITY	CONTRIBUTION OF THE TRAINEE	NUMBER OF HOURS
WEEK 1			
February 16	–	–	–
February 17	–	–	–
February 18	- Attended OJT orientation and company introduction. - Joined a facility tour and met staff. - Received Ticketing System project assignment. - Started developing a sample system UI. Learned PM roles and RACI with Sir Deniel.	- Actively engaged in orientation and company familiarization. - Took initiative by starting the Ticketing System prototype. - Applied basic PM concepts like RACI in planning. - Participated in discussions to understand project goals and responsibilities.	8 Hours
February 19	- Continued Ticketing System development. - Planned and created project timeline. - Enhanced system with additional features. Discussed progress and plans with the team.	- Assisted in organizing project timeline and tasks. - Enhanced system with new features. - Improved understanding through hands-on development. - Actively engaged in team discussions and coordination.	8 Hours

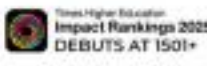

February 20			
WEEK 2			
February 23	- Refined system timeline for better sequencing and scheduling. - Started creating and structuring the system presentation. - Attended Zoho Desk demo to learn ticketing workflows and features.	- Improved project timeline clarity and accuracy. - Started structuring system presentation materials. - Gained insights from Zoho Desk to enhance system design.	8 Hours
February 24	HOLIDAY	HOLIDAY	
February 25	- Presented the current version of the Ticketing System to the team. - Continued studying and reviewing the system to better understand its workflow and features. - Evaluated presentation content and system components for possible improvements.	- Demonstrated confidence in presenting the system, strengthened understanding of its workflow through continuous review, and contributed to identifying improvements in both the system and presentation content.	8 Hours
February 26	- Fixed and enhanced the system presentation based on feedback. - Led the team meeting and facilitated project discussions. - Presented updated progress of the Ticketing System. - Took notes on revisions and improvement areas.	- Demonstrated leadership by guiding team discussions and ensuring alignment, effectively communicated project updates, applied feedback to improve outputs, and maintained attention to detail by documenting key revisions and areas for improvement.	8 Hours
February 27	- Created a revisions list for system improvements. - Developed a Gantt chart for project scheduling. - Tested and refined system features.	- Showed strong planning and organization, improved system functionality through testing, and applied insights from Zoho Desk to enhance the system.	8 Hours

	- Attended Zoho Desk demo for insights.		
WEEK 3			
March 2	- Monitored and updated the system timeline. - Reviewed system revisions and progress. - Discussed 3F's (Friendly, Fair, Firm) in communication.	- Maintained accurate tracking of project progress, ensured consistency in system updates, and applied professional communication principles to support effective teamwork and project management.	8 Hours
March 3	- Monitored system progress based on timeline. - Coordinated with developers on updates. - Reviewed tasks and created a progress tracking sheet. - Continued preparing the project presentation.	- Ensured project tasks stayed on track, maintained coordination with the development team, improved progress visibility through tracking, and supported project communication through presentation preparation.	8 Hours
March 4	- Communicated with the team to discuss updates and tasks. - Finalized and reviewed the project presentation slides. - Coordinated with Sir Luis on system hosting setup.	- Maintained clear communication within the team, ensured readiness of presentation materials, and supported system deployment by coordinating hosting requirements.	8 Hours
March 5	- Finalized and reviewed presentation slides. - Prepared system presentation and demo. - Coordinated with team on flow and assigned parts. - Checked system progress for demo readiness.	- Ensured the presentation and demo were well-prepared, aligned team coordination for smooth delivery, and verified that system updates were accurately reflected in the presentation.	8 Hours

March 6	- Created a task sheet for the 2nd meeting. - Reviewed system progress and identified improvements. - Coordinated with developers on UI and updates. - Monitored implementation of changes. - Sent GitHub repository for hosting and deployment.	- Organized tasks for better tracking of revisions, supported system improvement by identifying UI enhancements, maintained coordination with developers, ensured changes were properly implemented, and facilitated deployment by providing the repository for hosting.	8 Hours
WEEK 4			
March 9	- Monitored system progress based on planned features and requirements. - Updated task sheet for revisions and tracking. - Coordinated with Sir Dex on hosting setup.	- Maintained alignment of development tasks with system requirements, ensured accurate tracking of revisions and progress, and supported deployment preparation through coordination on hosting setup.	8 Hours
March 10			
March 11	- Attended meeting with Ma'am Tracy, Sir Luis, and the team on system flow and revisions. - Updated and monitored the system progress sheet. - Participated in meeting with Sir Dex, Ma'am Angelou, and the team on backend revisions and system domain.	- Ensured alignment on system flow and revisions through active meeting participation, maintained accurate tracking of project progress, and contributed to discussions on backend improvements and system deployment.	8 Hours
March 12	- Updated task status in the tracking sheet. - Created the R3 Retrospective PowerPoint. - Communicated with the team on system flow and revisions.	- Maintained accurate task tracking, supported documentation through presentation creation, ensured clear communication on system updates, and contributed to	8 Hours

	- Attended overtime meeting with Ma'am Tracy and the team.	project alignment during extended discussions.	
March 13	- Updated system development task status. - Coordinated with developers on UI improvements. - Discussed revisions and workflow with Sir Luis, Ma'am Tracy, and the team.	- Maintained up-to-date tracking of development tasks, supported UI enhancements through coordination with developers, and contributed to refining system workflow through discussions with the team.	8 Hours

WEEK 5

March 16	- Finalized the R3 Retrospective presentation. - Improved and refined the system UI. - Conducted team discussion on system progress. - Coordinated with developers on revisions and updates. - Met with Sir Luis, Ma'am Tracy, and Sir Deniel for feedback.	- Ensured clear presentation of project updates, enhanced system usability through UI improvements, supported team alignment on priorities, facilitated communication of revisions with developers, and incorporated feedback to improve the system.	8 Hours
March 17	- Created and completed the Project Charter. - Organized and uploaded reports to Google Drive. - Assisted in testing the deployed system. - Documented issues and noted revisions.	- Supported project documentation and organization, contributed to system testing activities, ensured proper tracking of issues, and helped identify necessary improvements based on testing results.	8 Hours
March 18	- Tested the system for errors and improvements. - Discussed issues with developers for resolution. - Created and improved the system UI. - Met with Ma'am Tracy and Sir Luis for revisions.	- Contributed to system quality through testing and issue resolution, improved usability by enhancing the UI, maintained clear communication with the team, and ensured accurate tracking of project progress.	8 Hours

	- Updated the task sheet with current progress.		
March 19	- Designed and created Knowledge Base UI for Employee and Admin. - Monitored overall system progress. - Tested system functionality and issues. - Discussed updates with Ma'am Tracy and Sir Luis.	- Enhanced system usability through UI design, ensured tasks remained on track through monitoring, identified issues through testing, and contributed to system improvements through team discussions.	8 Hours

A LEADING COMPREHENSIVE
POLYTECHNIC UNIVERSITY IN ASIA

Date: Feb 18 - Feb 19, 2026

WEEK 1

During my first week of OJT, I was introduced to the company's environment, workflow, and expectations, which helped me adjust to a professional setting. Attending the orientation and company introduction gave me a better understanding of the organization's background, its goals, and how each department works together. The guided tour of the Blue House and Farmasee also helped me feel more comfortable and familiar with the workplace, making it easier for me to adapt as a trainee.

I was assigned to develop a Ticketing System, which I found both exciting and challenging. This task allowed me to apply the knowledge and skills I learned in school to a real-world project. Starting with a sample prototype helped me understand the process of system development, from planning to design. It also improved my technical skills and problem-solving abilities as I explored how to make the system more functional and user-friendly.

I also had a discussion with Sir Deniel about the roles and responsibilities of a Project Manager, especially the RACI framework. This helped me realize the importance of having clear role assignments, accountability, and proper communication within a team. Through this experience, I learned how teamwork and coordination contribute to the success of a project. Overall, my first week was a valuable learning experience that helped me gain confidence and better understand the real work environment.

Date: Feb 23 – Feb 27, 2026

WEEK 2

During my second week, I became more actively involved in the development and documentation of the Ticketing System. I worked on refining the project timeline, creating presentation materials, developing the Gantt chart, and compiling the revisions list. These tasks helped me better understand how projects are planned and organized in a real work environment. It also improved my attention to detail and ability to manage multiple responsibilities at the same time.

I was also given the opportunity to lead a team meeting and present the system's progress. At first, I felt a bit nervous, but this experience helped me build my confidence in communication and leadership. I learned how to clearly explain ideas, listen to feedback, and coordinate with team members effectively. This experience made me realize the importance of teamwork, proper communication, and being responsible for assigned tasks.

In addition, attending multiple Zoho Desk demo sessions gave me valuable insights into how a real ticketing platform works. It allowed me to compare our system design with actual industry practices and identify areas for improvement. Overall, my second week was productive and full of learning. It helped strengthen my technical, organizational, and communication skills, and I am motivated to continue improving and contributing more in the coming weeks.

Date: March 2 – March 6, 2026

WEEK 3

This week helped me understand more about how a project is managed and monitored in a real work environment. By checking the system timeline and reviewing the progress of the ticketing system, I realized how important it is to keep tasks organized and aligned with the project schedule. Monitoring updates and completed tasks also helped me become more attentive to details and more responsible in tracking the progress of the project.

I also learned a lot from communicating with the team and the developers. Discussing updates, revisions, and UI improvements showed me how important teamwork and coordination are to make sure everyone is working toward the same goal. Guiding the developers and reviewing their updates allowed me to see how even small changes can improve the overall system. This experience also helped me improve my communication skills and confidence in working with a team.

Preparing and finalizing the PowerPoint presentation and system demo also improved my ability to organize information and explain project progress clearly. The discussion about the 3F's (Friendly, Fair, and Firm) reminded me that professionalism and proper communication are important in handling different situations at work. Overall, this week gave me a better understanding of project coordination, communication, and system development, while also helping me become more responsible in monitoring tasks and supporting the team to keep the project moving forward.

Date: March 9 – March 13, 2026

WEEK 4

Throughout the week, I actively contributed to the development of the Ticketing System by designing and improving UI components for both the Employee and Admin perspectives. I also performed system testing to identify errors and ensure that all features were working properly. These tasks helped me enhance my technical skills, especially in UI design and system functionality, while also improving my attention to detail.

I also took part in monitoring the overall progress of the project to ensure that all tasks were aligned with the planned timeline and requirements. By regularly checking updates and tracking completed work, I became more aware of how important it is to keep everything organized and on schedule. This responsibility helped me develop better time management and coordination skills within the team.

In addition, I consistently communicated with the team, including discussions with Ma'am Tracy and Sir Luis, to clarify updates, gather feedback, and apply necessary revisions. These interactions helped me understand the value of teamwork, clear communication, and being open to suggestions. Overall, this week improved my ability to collaborate effectively, adapt to feedback, and contribute to the continuous improvement of the system.

Date: March 16 – March 19, 2026

WEEK 5

This week, I continued to contribute to the Ticketing System by monitoring the project's progress, updating task statuses, and ensuring that all tasks were aligned with the planned timeline and system requirements. By doing this regularly, I became more responsible and developed a better understanding of how important it is to keep everything organized and on schedule. It also helped me stay focused on the overall goals of the project.

I was also involved in testing the system to identify issues and ensure that all features were functioning properly. Through testing, I learned how to carefully check for errors and think of ways to improve the system. This experience enhanced my attention to detail and helped me understand the importance of quality assurance in system development.

In addition, I coordinated with the developers to address revisions and improvements. I actively participated in team discussions and meetings to clarify updates, workflow changes, and project priorities. These experiences helped me improve my communication skills and understand how teamwork plays a big role in achieving project success.

Lastly, I assisted in preparing and organizing presentation materials to clearly communicate the project's progress and updates. This helped me improve my ability to present information in a simple and organized way. Overall, this week helped me enhance my skills in project coordination, communication, and problem-solving, while also deepening my understanding of system development in a real work environment.

ENGR. KELVIN CHRYZTH P. VELASQUEZ
Chief Human Resource & Transformation Officer
LEADS Agricultural Products Corporation
Unit A 204-205 2nd Floor Coral Center, Brgy. San Francisco, Biñan, Laguna 4024

Dear Mr. Velasquez,

Warmest greetings from the PUP Biñan Campus!

Our University is implementing an on-the-job training program for our Bachelor of Science in Information Technology students designed to provide them with hands-on experiences related to their field so they can have a better understanding and appreciation of the different concepts and learning they have acquired in school. Specifically, this program aims to expose students to the different facets of information technology in a face-to-face setup. The practicum program also intends to instill in them the necessary work ethics, values, human relations skills and other competencies that will prepare them in the world of work.

May we, therefore, request your good office to allow **Angelica L. Herrera**, a fourth year student, to undergo on-the-job training in your company on a pre-arranged schedule. She will report to your office until the maximum requirement of 500 hours has been fully completed.

We have attached a draft copy of the Memorandum of Agreement between the Polytechnic University of the Philippines and your company. Once the trainee applicant is accepted, may we request the information needed in the MOA so we can prepare the final copy.

Thank you very much as we anticipate for your favorable attention on this regard. May this be the beginning of a fruitful relationship between our university and your company. Together, let us shape the hearts and minds of our society's future workforce.

Sincerely yours,

MICHAEL ANJELO O. MIGUEL
OJT Adviser
