PUP PROFILE

History

The Polytechnic University of the Philippines (PUP) is a government educational institution governed by Republic Act Number 8292 known as the Higher Education Modernization Act of 1997, and its Implementing Rules and Regulations contained in the Commission on Higher Education Memorandum Circular No. 4, series 1997. PUP is one of the country's highly competent educational institutions. The PUP Community is composed of the Board of Regents, University Officials, Administrative and Academic Personnel, Students, various Organizations, and the Alumni.

Governance of PUP is vested upon the Board of Regents, which exercises policy-making functions to carry out the mission and programs of the University by virtue of RA 8292 granted by the Commission on Higher Education. The University is administered by an appointed President by virtue of RA 8292 and is assisted by an Executive Vice President and the Vice Presidents for Academic Affairs, Student Services, Administration, Research, Extension and Development, and Finance.

This institution started as the Manila Business School (MBS), founded in October 19, 1904 as part of the city school system under the superintendence of C.A. O'Reilley, which responds to the demand for training personnel for government service and the felt need to provide skills essential for private employment. In 1908, it was renamed as Philippine School of Commerce (PSC) and merged with the Philippine Normal School (PNS) in 1933 to 1946. By virtue of Republic Act 778, the PSC was again changed to Philippine College of Commerce (PCC) in 1952. Subsequently, the Philippine College of Commerce (PCC) was converted into a chartered state university, now known as the Polytechnic University of the Philippines by virtue of Presidential Decree Number 1341 issued by the President of the Philippines on April 1, 1978.

PUP is a public, non-sectarian, non-profit institution of higher learning primarily tasked with harnessing the tremendous human resources potential of the nation by

MANAGEMENT SYSTEM IS CERTIFIED
ACCORDING TO ISO 21001

improving the physical, intellectual and material well-being of the individual through higher occupational, technical and professional instruction and training in the applied arts and sciences related to the fields of commerce, business administration, and technology.

With more than twenty campuses serving more than 80,000 students, the Polytechnic University of the Philippines is the largest university in terms of student population. The main campus is named after a national hero, Apolinario Mabini, and is located in Sta. Mesa, Manila - in the middle of a busy metropolitan. But despite of this, the environment within its perimeter is a place conducive of learning.

Majority of the students belong to the economically challenged level of society. It is the University's commitment to give qualified and talented students access to quality and responsive education to aid them in the achievement of their dreams and improve their lives. Being a well-educated and skilled individual, they will not only become job seekers but job creators as well, a force of knowledge workers and entrepreneurs.

Scholars of the Nation (*Iskolar ng Bayan*), that is what we call our students because the Philippine Government and other non-government institutions subsidize their tuition and other fees. More than a hundred of the student population are foreigners from China, Singapore, Indonesia, Cambodia, Myanmar, Tanzania, Nigeria, and Ghana. They are enrolled in business, language, statistics, communication, and education courses in the undergraduate and graduate levels. Students from Korea regularly visit PUP in summer to take up Intensive English courses.

The Polytechnic University of the Philippines takes pride in its capability to accommodate the student needs because it:

- Has more than 25 campuses to make education accessible to everyone;
- Offers a wide range of courses: doctorate, master's, and bachelor's degrees as well as technology courses available through traditional and open, flexible or

distance learning;

- Pioneered the ladderized system and the accreditation and equivalency system through the Expanded Tertiary Education Equivalency and Accreditation Program (ETEEAP) and the Nontraditional System Program (NTSP);
- Maintains an average size of 45-50 students per class;
- Offers an extensive selection of educational choices through more than 60 undergraduate and graduate programs;
- Schedules weekend and evening classes;
- Brings the resources and programs of PUP not only to full-time students but also to part-time and adult learners; and
- Provides a long list of extension services for the community and the country.

The commitment of its leaders, faculty, staff, students, alumni and friends has formed the cornerstone of this University that has exceeded expectations with every generation of the graduates it has produced since its establishment.

Today, PUP is relishing its successes and its students are enjoying unprecedented academic opportunities, an enhanced campus environment, upgraded colleges, state-of-the-art technology, and nationally and internationally recognized programs.

PUP celebrated its centenary last October 2004. It has gone far from what it was more than a century ago. This is mainly due to the support given by the government and the PUP Community and its benefactors. With the combined effort, PUP will continue to be a partner in nation-building and in poverty alleviation for the marginalized sector of society with quality, responsive, and relevant education as a tool.

Polytechnic University of the Philippines – Biñan Campus

Polytechnic University of the Philippines – Biñan Laguna Campus consistent to its mission of making city of Biñan into premier city with a tagline of ‘Unlad Biñan!’, former Mayor Marlyn B. Alonte-Naguiat now a Congresswoman of Lone District of Biñan City entered into agreement with Polytechnic University of the Philippines (PUP) through a Memorandum of Agreement (MoA) dated September 15, 2009 to establish a PUP campus in the city of Biñan. Through this partnership, quality education become accessible to every Biñanense, thus, respond to the needs of the largest estates and export processing zones located in the city. Equipped with (13) classrooms, (3) laboratory rooms, an audio-visual room, a student-center, an air-conditioned library and an elevator, PUP-Biñan Campus presently offers (8) Bachelor Degree and (2) Diploma Courses.

(Source: PUP-Biñan)

Rationale of the On-The-Job Training

On-The-Job Training also called practicum of internship depending on the nature of the academic program, is a course requirement for baccalaureate degree which provides as opportunity among students to apply the theories, principles and ideas learned in the academic environment to actual work settings under the guidance and supervision of their skills and prepare them for the “world of work” after collage. Attainment of the On-The-Job Training program objectives ensures the readiness of the graduates to face the challenges of the industry. Hence, vital as it is, OJT should be dynamic, technical, and managerial skill-centered for the students to effectively grasp the practical learning in the workplace.

Leads Agricultural Products Corp. (LAPC)

Since 1997, **Leads Agricultural Products Corp. (LAPC)** has been the partner of Filipino farmers in sustaining their livelihood. **For almost three decades now**, Leads Agri has been nurturing the vision of a developed society rooted in an agricultural system that thrives amid calamities and global pandemics. By collaborating with groups that share the same goal in uplifting the Philippine agricultural sector, the company strives to overcome our unrealized potential in industries connected to it.

The year 2020 saw us breach the 2-billion peso sale mark. This, with the company starting small and initially overlooked by the industry and that barely hits their growth targets, is benchmark of progress. We now have more than 500 employees serving over a thousand agricultural dealers and distributors, which equip millions of Filipino farmers with the right tools and technology nationwide.

With these strong advantages under our wing, the Leads Group of Companies now has ten subsidiaries that foster the same principles.

With an experience portfolio that covers multiple industries, we continue to expand a dream started by Filipinos for the Filipinos.

LEADS Mission

Leads Agri is committed to provide a broad portfolio of science-based and cost-effective agricultural solutions to Filipino farmers through various channels in all agricultural areas in the Philippines through cutting edge and innovative technology. We strive to improve market reach by empowering the farming communities and other stakeholders in the agriculture value chain to produce sustainable, accessible, and affordable food for every Filipino family.

We engage every individual with dignity and utmost respect regardless of societal status. **"Paggawa ayon sa patnubay ng pananampalataya at malasakit"**

LEADS Vision

As the leading company that provides future-proof farm productivity solutions and services, we envision to be a pillar of hope and assume a pivotal role towards innovating the country's agricultural value chain for the welfare of the Filipino farmers.

Company Tagline

"Masaganang Ani, Masaganang Buhay"

Core Values

- **Service:** Commitment to understanding and meeting the needs of Filipino farmers.

		incorporating feedback for improvement.	
WEEK 3			
March 2	- System design and workflow review - Professional development discussion	- Assisted the developers in reviewing and improving the system flow. - Participated in discussions to gain insights about workplace values and future career goals.	8 Hours
March 3	- System testing and debugging - Issue reporting and coordination - User interface (UI) improvement support	- Conducted system testing to identify errors and bugs. - Reported issues to the developers to help improve the system's functionality. - Assisted the team in enhancing the user interface for better usability.	8 Hours
March 4	- System testing and issue identification - System process discussion and presentation preparation	- Conducted testing to identify system errors and reported the issues to the developers. - Participated in discussions to better understand the system process and help prepare for the upcoming presentation.	8 Hours
March 5	- Project presentation and discussion - System process explanation	- Participated in the R2 retrospective presentation with the supervisors. - Presented the system blueprint diagram and explained the system process and workflow.	8 Hours
March 6	- Documentation and report preparation	- Started preparing the accomplishment deck assigned by Sir Deniel.	8 Hours

	- Project documentation organization	- Organized and worked on completing the daily accomplishment report.	
WEEK 4			
March 9	- System setup and network configuration - System testing and UI review - Issue reporting and coordination	- Coordinated with the developers to enable system access through ngrok for cross-network testing. - Conducted system testing and identified UI inconsistencies. - Reported the issues to the developers and suggested improvements to enhance the system.	8 Hours
March 10	-		
March 11	- Technical meeting and system discussion - System testing - Documentation preparation	- Participated in discussions about the system code with the team. - Assisted in testing the system to identify possible issues. - Started preparing the User Acceptance Testing (UAT) documentation for the ticketing system.	8 Hours
March 12	- System testing and validation - Documentation of testing results - System flow discussion and clarification	- Assisted in testing the system with the team to ensure its functionality. - Continued preparing the User Acceptance Testing (UAT) documentation. - Participated in discussions to clarify system flow changes and support system improvements.	10 Hours

March 13	- System consultation and design review - System testing and error documentation	- Participated in the consultation regarding the revised blueprint diagram and new system features. - Conducted system testing and documented the errors found to help improve the system.	8 Hours
WEEK 5			
March 16	- System testing and issue identification - Project presentation and discussion	- Conducted system testing and reported identified issues to the developers. - Participated in the R3 Retrospective presentation by contributing to the discussion of system updates.	8 Hours
March 17	- System testing and issue reporting - Project documentation - Project planning support	- Conducted system testing and reported identified issues to the developers. - Contributed to the Project Charter by adding the system diagram. - Assisted the project manager in developing and updating the Gantt chart.	8 Hours
March 18	- System testing and validation - Documentation of testing results - Issue reporting and coordination	- Continued preparing the User Acceptance Testing (UAT) documentation. - Conducted system testing and identified issues and inconsistencies. - Reported findings to the developers to support system improvement.	10 Hours
March 19	- System testing and validation	- Continued developing the User Acceptance Testing (UAT) documentation.	8 Hours

	- UAT documentation - Issue reporting and coordination	- Conducted system testing and identified issues and inconsistencies. - Communicated findings to the developers to support necessary fixes and improvements.	
March 20	- Holiday		
WEEK 6			
March 23	- System testing and validation - Issue reporting and coordination - UAT documentation	- Conducted continuous system testing and identified issues. - Reported findings to the developers for correction and improvement. - Continued preparing the User Acceptance Testing (UAT) documentation for each module.	8 Hours
March 24	- System testing and validation - UAT documentation - Project presentation and discussion	- Conducted system testing and reported identified issues to the developers. - Completed the User Acceptance Testing (UAT) for the Account Creation module. - Participated in the R4 Retrospective Updates by contributing to the discussion of system progress and improvements.	8 Hours
March 25	- System testing and validation - Feature discussion and system analysis - UAT documentation	- Conducted system testing and participated in discussions about the chat module, focusing on communication and validation.	8 Hours

		- Completed the User Acceptance Testing (UAT) documentation for Ticket Creation, Submitted Ticket, and Assigned Ticket modules.	
March 26	- System testing and issue discussion - UAT documentation - System enhancement discussion	- Conducted system testing and discussed identified issues with the team for improvement. - Completed the User Acceptance Testing (UAT) documentation for the Knowledge Base module. - Shared suggestions to enhance system features, including filters and email notification attachments.	8 Hours
March 27	- System testing and issue identification - Issue discussion and coordination	- Conducted system testing and identified issues, including UI inconsistencies and ticket-related errors. - Communicated and discussed the identified issues with the team to support system improvement and resolution.	8 Hours
WEEK 7			
March 30	- System testing and validation - Presentation preparation - UAT demo presentation	- Tested the system and assisted in preparing for the UAT demo presentation. - Participated in presenting the ticketing system to the HR and Admin teams. - Helped ensure a smooth presentation through practice and system checking.	8 Hours

March 31	- System testing and validation - Presentation preparation - UAT demo presentation	- Conducted system testing to ensure smooth functionality before the presentation. - Participated in presenting the ticketing system to MPDC. - Helped ensure a smooth and successful demo by verifying the system flow beforehand.	8 Hours
April 1	- System testing and UI issue resolution - Team coordination and feedback discussion	- Conducted system testing and coordinated with developers to resolve loading screen UI issues. - Communicated feedback and suggestions from previous meetings to support system refinements and improvements.	4 Hours
April 2	- Holiday		
April 3	- Holiday		
WEEK 8			
April 6	- System testing and feature validation - UI enhancement support - Admin module improvement	- Tested the conference room booking feature to ensure its functionality. - Assisted in improving the user interface for better usability. - Supported the refinement of the admin side of the booking feature.	8 Hours
April 7	- System testing and issue identification - Issue reporting and coordination	- Conducted system testing and identified errors during usage.	8 Hours

	- Feature discussion and review	- Reported issues to the developers to support system improvement. - Participated in discussions about new admin features for the booking reservation system.	
April 8			
April 9	- Holiday		
April 10	- Project presentation and demonstration - User Acceptance Testing (UAT)	- Conducted a UAT presentation of the ticketing system to the HR and Admin departments. - Explained the suggested system additions and gathered feedback for improvement.	8 Hours
WEEK 9			
April 13	- Project presentation and demonstration - User Acceptance Testing (UAT)	- Conducted a UAT presentation with MPDC via Google Meet. - Demonstrated the Booking Reservation feature and explained the added categories for the MPDC ticket flow.	8 Hours
April 14	- System testing and validation - Issue reporting and coordination	- Conducted system testing and identified errors during usage. - Reported issues to the developers to support system improvement.	8 Hours
April 15	- System testing and validation - Issue reporting and coordination	- Conducted system testing and identified errors during use. - Reported the identified issues to the developers to	8 Hours

		support system improvements.	
April 16	- System testing and validation - Issue reporting and coordination - System feature discussion and review	- Conducted system testing and identified errors during use. - Reported issues to the developers to support system improvement. - Coordinated with supervisors regarding HR and IT category organization.	8 Hours
April 17	- System testing and validation - Issue reporting and coordination - Project presentation and update	- Conducted system testing and identified errors during use. - Reported issues to the developers to support system improvement. - Presented system updates to the supervisor to communicate progress.	8 Hours
WEEK 10			
April 20	- User Acceptance Testing (UAT) presentation - System demonstration and discussion - Feedback gathering and evaluation	- Conducted UAT demo presentations of the ticketing system for different departments. - Explained system features and workflows to the participants. - Collected feedback and suggestions to support system improvements and enhancements.	8 Hours
April 21	- User Acceptance Testing (UAT) presentation - System demonstration and discussion	- Conducted UAT demo presentations for the Marketing Creatives, Accounting, and Bidding departments.	8 Hours

		- Demonstrated the system features and explained the ticketing system workflow to the participants.	
April 22			
April 23	- System testing and validation - Issue reporting and follow-up	- Conducted testing on the deployed system and identified errors during use. - Reported and followed up the identified issues with the developer for correction and system improvement.	8 Hours
April 24	- System testing and validation - Issue documentation and reporting	- Conducted system testing and identified issues related to the Knowledge Base video upload feature. - Documented and reported the identified issues in the task sheet to support system correction and improvement.	8 Hours
WEEK 11			
April 27	- System testing and issue coordination - User Acceptance Testing (UAT) presentation - System demonstration and discussion	- Conducted system testing and coordinated with the developers to resolve issues in the Sales department and ticket submission process. - Performed a UAT demo presentation for the Admin and HR department. - Explained the system features and workflow to support user understanding and feedback gathering.	8 Hours
April 28	- System testing and issue coordination	- Conducted system testing and coordinated with the developers to resolve	8 Hours

	- User Acceptance Testing (UAT) presentation - System demonstration and preparation	issues before the presentation. - Performed a UAT demo presentation for the Marketing Operations team. - Helped ensure the system was ready and functioning properly for the scheduled demonstration.	
April 29	- System testing and issue coordination - System update discussion and evaluation - Feedback review and consultation	- Conducted system testing and coordinated with the developers to resolve identified errors. - Participated in discussions regarding system updates and departmental recommendations after the UAT demo presentation. - Helped support system improvements through testing and feedback coordination.	8 Hours
April 30	- User Acceptance Testing (UAT) presentation - System demonstration and discussion	- Conducted a UAT demo presentation of the system with the Farmasee employees and Sir Joel. - Demonstrated the system features and explained the workflow to the participants.	8 Hours

Date: Feb 16 - 20, 2026

WEEK 1

The first week of OJT consists of orientation, project meetings, and system planning activities that helped me understand the company profile and the tasks that we will be doing. During this week, I was able to meet the employees and our supervisor, learn about my assigned roles, and start collaborating with the team. I felt both excited and motivated because this experience is new to me and helps me understand how the real-world works. I also appreciated how welcoming our supervisor was, especially when he treated us at Kuta Balwarte on our second day.

Date: Feb 23 - 27, 2026

WEEK 2

The second week of OJT consists of system planning, design, and preparation for the project presentation. During this week, I worked on developing and improving the system blueprint diagram and researching the workflow of the ticketing system to better understand how it works. We also finished developing Phase 1 of our system and had a successful presentation, with only minor revisions and additional features suggested.

Date: Mar 2 - 6, 2026

WEEK 3

The third week of OJT consists of system testing, project presentation, and documentation tasks. During this week, I was able to test the system, identify errors, report issues to the developers, and assist in improving the user interface. I also had the opportunity to present the system blueprint diagram during the R2 retrospective, which helped improve my confidence in explaining the system's process and workflow.

Date: Mar 9 - 13, 2026

WEEK 4

The fourth week of OJT consists of system setup, testing, consultation, and documentation activities that helped improve the development of our ticketing system. During this week, I was able to coordinate with the developers to enable cross-network testing using ngrok, assist in system testing, and document errors and testing results through the UAT documentation. I also participated in consultations with our supervisors to review the revised blueprint diagram and discuss new system features.

Date: Mar 16 - 20, 2026

WEEK 5

The fifth week of OJT consists of system testing, issue reporting, documentation, and project planning activities that helped me become more involved in both the technical and documentation aspects of the system. During this week, I continuously tested the system, identified issues, and reported them to the developers, while also working on the UAT documentation and contributing to the project charter and Gantt chart. I also participated in the R3 Retrospective presentation with the team.

Date: Mar 23 - 27, 2026

WEEK 6

The sixth week of OJT consists of continuous system testing, issue reporting, UAT documentation, and participation in project discussions. During this week, I was able to consistently test the system, identify and report issues, and complete several UAT documents for different modules. I also had the opportunity to participate in discussions about system features and improvements, which helped me understand the system more deeply. Overall, this week helped me improve my attention to detail,

QUALITY MANAGEMENT
SYSTEM IS CERTIFIED

MANAGEMENT SYSTEM IS CERTIFIED
ACCORDING TO ISO 21001

confidence in communicating with the team, and my ability to contribute ideas for system enhancement.

Date: Mar 30 – April 3, 2026

WEEK 7

The seventh week of OJT consists of system testing, UAT demo presentations, and team coordination for system improvements. During this week, I had the opportunity to present the ticketing system to different departments such as HR, Admin, and MPDC, which helped me improve my confidence in presenting and explaining the system. I also continued testing the system and worked with the developers to resolve UI issues and apply feedback from previous meetings. Overall, this week was a valuable experience that enhanced my communication skills, confidence, and ability to contribute to system improvements.

Date: April 06 – April 10, 2026

WEEK 8

The eight week of OJT consists of system testing, feature validation, UI improvements, and project presentation activities. During this week, I was able to test the conference room booking feature, identify issues, and assist in improving both the user interface and the admin side of the system. I also participated in discussions about new features and had the opportunity to present the system to the HR and Admin departments through a UAT presentation. This experience helped me become more confident in both testing and presenting, and I was able to see how user feedback contributes to improving the system.

Date: April 13 – April 17, 2026

WEEK 9

SYSTEM IS CERTIFIED
ACCORDING TO ISO 9001

EDUCATIONAL ORGANIZATION
MANAGEMENT SYSTEM IS CERTIFIED
ACCORDING TO ISO 21001

The ninth week of OJT consists of system testing, issue reporting, project presentation, and coordination activities that helped me stay actively involved in improving the system. During this week, I conducted continuous testing, identified errors, and reported them to the developers, while also coordinating with supervisors regarding system features such as category organization. I also had the opportunity to present the system to MPDC and share updates with my supervisor, which helped me improve my confidence in communicating progress.

Date: April 20 – April 24, 2026

WEEK 10

The tenth week of OJT consists of User Acceptance Testing (UAT) presentations, system demonstrations, feedback gathering, and system testing activities. During this week, I had the opportunity to present the ticketing system to different departments, explain its features and workflow, and collect feedback and suggestions for further improvements. I also continued testing the deployed system and documenting issues encountered during use to help improve the system's performance. These experiences helped me become more confident in presenting, communicating with users, and understanding the importance of continuous testing and feedback in system development.

Date: April 27 – May 1, 2026

WEEK 11

The eleventh week of OJT consists of system testing, issue coordination, User Acceptance Testing (UAT) presentations, and feedback discussions that helped me become more active in both the technical and presentation side of the project. During this week, I continuously tested the system, coordinated with the developers to resolve issues, and participated in discussions about system updates and departmental

recommendations. I also conducted several UAT demo presentations for different departments, which helped me improve my confidence in explaining the system and communicating with users. Overall, this week gave me more experience in handling real user feedback and understanding the importance of teamwork in improving the system.

ENGR. KELVIN CHRYZTH P. VELASQUEZ
Chief Human Resource & Transformation Officer
LEADS Agricultural Products Corporation
Unit A 204-205 2nd Floor Coral Center, Brgy. San Francisco, Biñan, Laguna 4024

Dear Mr. Velasquez,

Warmest greetings from the PUP Biñan Campus!

Our University is implementing an on-the-job training program for our Bachelor of Science in Information Technology students designed to provide them with hands-on experiences related to their field so they can have a better understanding and appreciation of the different concepts and learning they have acquired in school. Specifically, this program aims to expose students to the different facets of information technology in a face-to-face setup. The practicum program also intends to instill in them the necessary work ethics, values, human relations skills and other competencies that will prepare them in the world of work.

May we, therefore, request your good office to allow **Rachelle Ann L. Ambayan**, a fourth year student, to undergo on-the-job training in your company on a pre-arranged schedule. She will report to your office until the maximum requirement of 500 hours has been fully completed.

We have attached a draft copy of the Memorandum of Agreement between the Polytechnic University of the Philippines and your company. Once the trainee applicant is accepted, may we request the information needed in the MOA so we can prepare the final copy.

Thank you very much as we anticipate for your favorable attention on this regard. May this be the beginning of a fruitful relationship between our university and your company. Together, let us shape the hearts and minds of our society's future workforce.

Sincerely yours,

MICHAEL ANGELO O. MIGUEL
OJT Adviser
