Angelica Herrera

- Project Manager
- UI/UX Designer

Enzo Charles Mendoza

- Main Developer
- UI/UX Designer

Rachelle Ann Ambayan

- Quality Assurance
- Processing Engineering

Matthew Alexis Pascua

- Lead Developer
- Database Developer

INTRODUCTION

- A system designed to manage concerns, requests, and issues efficiently
- Helps organize tickets across different departments in one platform
- Ensures proper tracking from submission to resolution
- Improves communication between users and departments

PROBLEMS

- Concerns are difficult to track using manual or scattered communication
- Miscommunication can happen between departments
- Requests may be delayed, overlooked, or forgotten
- Lack of a centralized system leads to inefficiency

SOLUTIONS

- A centralized ticketing system for managing all concerns
- Provides organized and trackable requests in one platform
- Helps improve response time and overall efficiency
- Ensures proper handling and resolution of issues

KEY FEATURES

- Easy ticket submission
- Ticket status tracking
- Department-based handling
- Notifications and updates
- Chat / Messaging feature
- Ticket history and records
